# INTERNATIONAL GEOLOGY REVIEW

Volume 9, 1967

PERIODICAL

LIBRARY

published by

AMERICAN GEOLOGICAL INSTITUTE  
1444 N St., N.W., Washington, D.C. 20005

INTERNATIONAL GEOLOGY REVIEW is published monthly, with a supporting grant from the National Science Foundation. Papers selected for translation from a large number of Russian geological periodicals in all disciplines, and sometimes from the Chinese, Japanese and other geological literature are published in English. Non-serial works are reviewed and significant portions translated and published in IGR. Prepublication announcement of geologically important Soviet literature is a regular feature. IGR has an annual subject and author index.

Selection of papers for translation and publication is made on the advice of the AGI Translations Committee and the liaison representatives of AGI member societies. However, readers are encouraged to suggest significant papers from the foreign literature for consideration. Comments and discussions of papers published in IGR are invited.
